G Prabhakar Reddy CBSE Principal

Dear Parent,

Greetings from The Gaudium School!

I take pride in informing you that we have high-profile faculty members, for your ward, who consistently show total commitment to work and high spirits for teamwork. The learning environment that we provide at The Gaudium is manured well that it sprouts and blooms the full potential of each gecko and at the same time facilitates continuous improvement for all the geckos.

We plan the delivery of subject literacy, Math skills and other concepts strategically that the geckos enjoy and benefit hundred per cent. The geckos are supported through Reading Intervention, a program for students with reading difficulties, a variety of specialist programmes including Physical Education, Performing Arts, Visual Arts and several extra-curricular activities including choir, camping and excursions.

The following values are pivotal to the life of our school and the school community –

Honesty Learning Responsibility Resilience Respect

We inculcate values through instructional practices and student management plans. At The Gaudium, we are committed to the safety of the geckos, the utmost. The staff and the School Council members stringently follow standard interactions and practices with the geckos and the fellow geckos respectively.

Our focus is on enhancing teacher capacity to facilitate continuous improvements in Literacy and Numeracy in student outcomes. I believe that the learned and committed staff of an organization drives it towards achieving its vision and mission – as a school, we have a well-designed curriculum in place which we rigorously and passionately follow and our teachers work on their teaching strategies and methods, consistently reviewing the student learning and performing data so that we can mould our geckos into confident, decisive and resilient individuals. Keeping this in mind, the learning experiences we provide the geckos with are diverse, challenging and are encouraging their curiosity, excitement for learning and quest for knowledge.

When it comes to The Gaudium's extended family, we emphasize building community participation and have a focus on promoting Parents in Partnership. They are invited to be a part of the celebrations and events such as School Annual Day, Sports Day, and School Concert. Our School Council feels the responsibility towards organizing student skill development events and it actively participates in decision making.

The launching of The Gaudium Sportopia is to provide an integrated high-performance centre and rehabilitation with residential facilities and much more.

I am sure you would encourage and appreciate all our efforts towards building a strong and confident generation.

City gets its first badminton Gurukul

TIMES NEWS NETWORK

Hyderabad: That things have changed from the 80s would be stating the obvious. That was the time when kids managed their sporting activity in the city —

the case in the last few decades, has to change," the Dronacharya award winner said and hoped this Gurukul would complement the nearly 25 such centres across the country.

The Gurukul here is planning to start state-of-the-art residential sports academies in 25 different disciplines on its 27-acre sprawling campus.

"Though several schools have made claims to develop sports on their campuses, it has not seen the light of the day. I'm glad this project is on. I will be there to deal with badminton and we've also managed to rope in a foreign coach from Indonesia," Gopi said.

"Two years ago when I visited Singapore. I saw how the students of classes 5

Sports and academics can go hand in hand now

India's first residential sports school opened at Gaudium Sportopia

BY SUBRAMANYAM HYDERABAD

India's chief badminton national coach P. Gopi Chand on Tuesday launched Badminton Gurukul Centre of Excellence at Gaudium Sportopia near here, which is said to be the India's first residential, fully-integrated world-class sports school.

The centre would start functioning with the formal inauguration of the eight-court badminton indoor stadium in a few days and by May 2020, all the other 24 disciplines, including tennis, squash, cricket, athletics,

gymnastics, football and basketball, would have full-fledged separate centres to take care of the needs and aspirations of students who wish to pursue both sports and academics, Mr. Gopi said.

Quality coaching

"We will appoint a foreign coach along with a team of dedicated support staff to ensure quality coaching and the trainers at the centre will have access to the Gopi Chand Academy," Mr. Gopi explained.

The state-of-the-art sports school has a target of grooming over 1,000 students in different sports and reputed former internationals would be appointed to ensure quality coaching, thanks to the interest shown by Kirthi Reddy, director and founder of The Gaudium School, he said.

Sports promotion

"We are determined to script a new chapter in the promotion of sports without affecting the studies of the sports-loving children through this B&S-centre project," said Prasad Mangipudi, strategic consultant of Gaudium Sportopia, and also the co-founder of Sportviva, which organises high-profile Premier Badminton League.

The Gaudium where I blossomed into a happy being

It has only been a few weeks that I have joined The Gaudium School. Since my very first day, I have been treated as its very own family. The teachers here are highly cooperative, interactive and friendly. They are bent on making the students understand all the concepts – a practice, I should say, which is usually not followed by all teachers of other schools. The students in The Gaudium are no different – they, especially the ones in my class, took me into their group and made me feel comfortable in a shorter time.

When talking about my past school life, I am sure, I was always a straight 'A' student, until they added letters of the alphabet in Math! And since then, I had been struggling for good grades. I had left everything to fate. I could no longer understand the concepts that the teachers explained, be it in Math, Social Studies or Science. I had stopped building upon my subject knowledge.

It was then I came across The Gaudium School. Finally, my hopes that were once about to wreck, started to flare up again within me. Studying in The Gaudium has not only increased my pace in comprehending concepts, but also has blessed me with some best efforts that can polish and shine my interests and talents.

Yes, I have gradually began to understand concepts that I never could before. Everyday I learn something new here, regardless of the fact that it's in the syllabus or not. Thanks to the wonderful teachers of The Gaudium. Now I am extremely excited and looking forward to joining the IB DP i.e., 11th Grade, in the same campus. Thanks to The Gaudium IBDP – it will enable me to opt for the subjects that I always wanted to study as they weren't in my previous school.
