Dear Parents,

Greetings from The Gaudium International School!!

Education is a life-long learning process. Learning happens all the time; not only in a pre-designated place called the school. It happens in the home, between home and school too. The home's and school's mission therefore is to provide a learning environment and opportunities to the children as the learners.

Shaping young, impressionable minds is one of life's biggest challenges. At Gaudium International School, Hyderabad, we aim to empower our students to grow as individuals with strong open discerning minds with an international perspective, preparing them to make a mark in the global village - the world has come to be today.

Our distinctive academic programs and innovative teaching methodologies encourage students to develop critical-thinking and learn through enquiry and reason, to exchange thoughts and ideas, to develop key personal and social values, to take ownership for his/ her choices and to set goals to realize their own unique potential.

Authentic education implies an on-going, continuous interplay between the five moments of context, experience, reflection, action and evaluation between parents, students and teachers. This is not to lead to mere information but to appropriation, integration into the very activity of Almighty within the created reality of our world but especially within each person. This then leads from information to transformation. The School by deepening a sense of wonder, reverence, creativity, fidelity, communication, openness and charity to each other and to the whole world seeks to work for the transformation of the complete person.

The teachers approach the classroom as one does a temple. Teacherstudent relationships take time to develop and deepen and need a climate of love and trust. There must also be continuity between teachers and students both within the classroom and in the wider school environment.

The Farmers' Market was organized on 9th November to develop Life Skills and to unearth hidden talents among students. It was attended by many parents and friends. It was a grand success. Thanks to the entire Gaudium Community.

All the meritorious students were honoured during the Academic Awards Ceremony on 13th November, which was well attended by the proud parents. I am sure it was a great inspiration to all the students and will develop a healthy competition among them.

We are proud of our students and their achievements. The teacher's community entertained all the students on The Children's Day,14th November by spreading the message that they are very close to their hearts. They are the future of our country and they deserve all the Learning Experiences that we can give them. We also recalled the great services rendered by Pandit Jawaharlal Nehru, whose birth anniversary is observed as the Children's Day.

We strive to provide an environment that is basically sacred and has a framework of discipline that is flexible yet supportive, a freedom that allows students to learn even from their mistakes, to develop into persons moulded by the correlatives of freedom and responsibility.

We value igniting the spark of creativity and curiosity in our students.

Yours in the Cause of Education, G Prabhakar Reddy

Highlights of the Month

- AWARENESS SESSIONS
- FIELD TRIPS FOR GRADE 6-8- BAKEFOOD PVT LTD
- FIELD TRIP GRADE 10- METEREOLOGICAL
 DEPARTMENT
- FARMERS MARKET
- MUN VISIT TO THE OXFORD UNIVERSITY
- ACADEMIC EXCELLENCE AWARDS FOR THE
 TOPPERS
- INTERACT CLUB INSTALLATION
- PTM-AN ACADEMIC REVIEW
- CHILDRENS DAY CELEBRATIONS
- NIGHT CAMP

SMART GOALS

School Events – Academic Excellence

Awarded as a Subject topper

Gathering for the event

Awareness Session - Topic: SMART Goals setting

- When it comes to achieving success, one of the most important steps that you
 can take is setting good goals. It is also important to recognize, though, that not
 all goals are created equal. Got an opportunity to take a session on goals setting
 called SMART goals and how one can use them to increase the chance of
 success.
- On 9 November 2019, students of Grade 6-8TH CBSE attended an awareness session that explored the five key areas related to goal setting the acronym of SMART namely-Specific, Measurable, Achievable, Relevant and time-based goals. The session was taken by Ms B.Rama, and Ms. Sowjanya Middle School ICT Facilitators (CBSE Segment). Discussed and explained in detail the benefits of setting, implementing and focussing on SMART goals with a slide show presentation for easy understanding. The interactive session was on-
- Specific: Well defined, clear, and unambiguous which means -the five
- "W" questions must be considered:

Who: Who is involved in this goal?

What: What do I want to accomplish?

Where: Where is this goal to be achieved?

When: When do I want to achieve this goal?

Why: Why do I want to achieve this goal?

Finally, the conclusion was on "The Importance of SMART Goal Setting"

 SMART goals set the students up for success by making it specific, measurable, achievable, realistic, and timely. The SMART method helps push the students further, gives them a sense of direction, and helps them organize and reach their goals.

Student Reflection

Shreya Jain School Prefect

Hi everyone,

It was a clear, summer morning when I visited The Gaudium School for the first time. The first thought that came into my mind then was how different it looked and felt from a traditional learning environment. There were trees everywhere and vivid flowers illuminated the path upon which I treaded. The red bricks that lined the walls made me feel almost as if I was amidst a fairytale: I was faced with a picturesque surreal scene. Then, the much-awaited first day of school arrived, and I met with my classmates: five idiosyncratic, uniquely skilled individuals, all from different cultural and social environments. That was the first time I was surrounded by so many people of different nationalities and social identities.

When I look at myself now and think about how I, 12-year-old, was when I first moved to Hyderabad and I am pleasantly surprised by how much I have evolved. In the 6th grade, I was just a timid kid who occasionally aced a few exams, and played pitiful games with her friends. Now, I am the student body president and class topper who can unwaveringly uphold her pious ideals to any number of people who question her, and for that, I owe Gaudium and the time that I have spent here. The Gaudium has moulded me into who I am today. Somewhere between being one in an ordinary class of thirty, and beginning my second year at the Gaudium, I found the inspiration and determination to rise above the shallow shell of being I had immersed myself in, and I wish all of my friends the same course of enlightenment I found in the phrontistery that I now call home.

NBA coach and Technical Director Mr Leo Bruno

NBA coach and Technical Director Mr Leo Bruno

Club Activities

Tech Titans

Activities: Game development

Learning Outcome: Learning to develop games.

Page Turners

Activity: Pictionary was used as a start-up activity to build a strong vocabulary based on a chosen theme.

Learning Objective: The competitive spirit and the sense of team solidarity that the activity promoted was a great way to learn new words.

Activity: Together with the above, preparations to present the Shakespearean play 'Much Ado about Nothing' is underway.

Learning Objective: The literary genius of Shakespeare will go a long way in bringing to the forefront the stage conventions of the times and instill an appreciation of the genre of drama.

Rang De

Activity: Jewelry Making-Bangles

Learning Outcomes: Concentration, creativity and handling things, teamwork

Spice Kraft

Activity: Instant Monaco Pizza

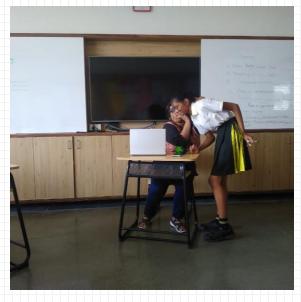

Learning Outcome: Time Management, Teamwork
